Virus Research 32 (1994) 415–417

Virus Research

Contents of Volume 32

No. 1

S. Takase-Yoden and R. Watanabe (Japan)
Accumulation of unintegrated viral DNA in rat glial cells infected with neurotropic Friend murine leukemia virus 1

B.R. Murphy, S.L. Hall, A.B. Kulkarni, J.E. Crowe, Jr., P.L. Collins, M. Connors, R.A. Karron and R.M. Chanock (USA)
An update on approaches to the development of respiratory syncytial virus (RSV) and parainfluenza virus type 3 (PIV3) vaccines 13

S.N. Shchelkunov, S.M. Resenchuk, A.V. Totmenin, V.M. Blinov and L.S. Sandakhchiev (Russia)
Analysis of the nucleotide sequence of 48 kbp of the variola major virus strain India-1967 located on the right terminus of the conservative genome region 37

A.M. Powers, K.E. Olson, S. Higgs, J.O. Carlson and B.J. Beaty (USA)
Intracellular immunization of mosquito cells to LaCrosse virus using a recombinant Sindbis virus vector 57

O.E. Obeid, C.D. Partidos and M.W. Steward (UK)
Analysis of the antigenic profile of measles virus haemagglutinin in mice and humans using overlapping synthetic peptides 69

T. Takimoto and A. Portner (USA)
The human parainfluenza virus type-1 prototypic strain contains a heat-labile hemagglutinin-neuraminidase protein 85

No. 2

Research Papers

M.B. Gardner (USA)
Introduction 93

J.E. Clements and S.L. Payne (USA)
Molecular basis of the pathobiology of lentiviruses 97

D.C. Sellon, F.J. Fuller and T.C. McGuire (USA)
The immunopathogenesis of equine infectious anemia virus 111

M.C. Zink and L.K. Johnson (USA)
Pathobiology of lentivirus infections of sheep and goats 139

M.A. Gonda, D.G. Luther, S.E. Fong and G.J. Tobin (USA)
Bovine immunodeficiency virus: molecular biology and virus–host interactions 155

V.M. Hirsch and P.R. Johnson (USA)
Pathogenic diversity of simian immunodeficiency viruses 183

P.N. Fultz and P.M. Zack (USA)
Unique lentivirus–host interactions: SIVsmmPBj14 infection of macaques 205

M.A. Simon, S.J. Brodie, V.G. Sasseville, L.V. Chalifoux, R.C. Desrosiers and D.J. Ringler (USA)
Immunopathogenesis of SIVmac 227

B.M. Blumberg, H.A. Gelbard and L.G. Epstein (USA)
HIV-1 infection of the developing nervous system: central role of astrocytes in pathogenesis 253

D.M. Anderson, M.B. Agy, D. Bowden, W.R. Morton and H.D. Liggitt (USA)
HIV infection in non-human primates: the *Macaca nemestrina* model 269

No. 3

Research Papers

R.J. Parks, P.J. Krell, J.B. Derbyshire and É. Nagy (Canada)
Studies of fowlpox virus recombination in the generation of recombinant vaccines 283

R.F. Meyer, M. Pacciarini, E.J. Hilyard, S. Ferrari, V.N. Vakharia, G. Donini, E. Brocchi and T.W. Molitor (USA, Italy)
Genetic variation of foot-and-mouth disease virus from field outbreaks to laboratory isolation 299

H.-G. Heine, A.D. Hyatt and D.B. Boyle (Australia)
Modification of infectious bursal disease virus antigen VP2 for cell surface location fails to enhance immunogenicity 313

Y. Ni and M.C. Kemp (USA)
Subgenomic S1 segments are packaged by avian reovirus defective interfering particles having an S1 segment deletion 329

N.A.J. McMillan and J. Kalmakoff (New Zealand)
RNA transcript mapping of the *Wiseana* iridescent virus genome 343

M.J. Jensen, I.W. Cheney, L.H. Thompson, J.O. Mecham, W.C. Wilson, M. Yamakawa, P. Roy and B.M. Gorman (USA)
The smallest gene of the orbivirus, epizootic hemorrhagic disease, is expressed in virus-infected cells as two proteins and the expression differs from that of the cognate gene of bluetongue virus 353

K.W. Ryan and U.F. Power (USA)
Selective interference with P protein binding to paramyxovirus nucleocapsids 365

N. Kamiya, M. Niikura, M. Ono, C. Kai, Y. Matsuura and T. Mikami (Japan)
Protective effect of individual glycoproteins of Newcastle disease virus expressed in insect cells: the fusion protein derived from an avirulent strain had lower protective efficacy 373

G.-Y. Hwang, M. Xiang and J.K.-K. Li (USA, People's Republic of China)
Analyses and conservation of sequences among the cognate L3 segments of the five United States bluetongue viruses 381

C.A.O. Adeyefa, K. Quayle and J.W. McCauley (UK)
A rapid method for the analysis of influenza virus genes: application to the reassortment of equine influenza virus genes 391

S.R. Moss and P.A. Nuttall (UK)
Subcore- and core-like particles of Broadhaven virus (BRDV), a tick-borne orbivirus, synthesized from baculovirus expressed VP2 and VP7, the major core proteins of BRDV 401
